CAREER OBJECTIVE

Enthusiastic Software science graduate from the University of Punjab with 03 months of experience in web development and design. Looking to deliver excellent web development skills in ASP.NET and Python to help grow the business. I have a proven history of a strong ethics and passion for web design. Excited to pursue new companies to grow my skills while facilitating the empowerment and vocalization of marginalized communities.

PROJECTS

Ticket Booking System (Backend)

- I achieved a seamless backend development by utilizing .NET Core and C#, resulting in effortless exploration of upcoming events and intuitive navigation features, enhancing the overall browsing experience.

Fake News Detection System

- I developed an ASP.NET application for annotating news data by true/false and categories, resulting in a structured dataset for model training.
- I achieved an 88% accuracy in fake news detection by preprocessing data and using Python to implement Logistic Regression, SVM, Naive Bayes, and an Ensemble Model.

Ecommerce Shop for Fruits

- I developed a responsive ecommerce platform for the fresh fruit market by utilizing PHP and MySQL, resulting in efficient data management and seamless transactions.
- I enhanced the overall shopping experience by implementing robust user authentication and intuitive features, including dynamic product listing, streamlined shopping cart functionality, and secure checkout procedures.
